Codechef's Competitive Programming Contest

Get Ready for an exciting contest to test your competitive programming skills. A team contest with 5 members and 15 problems on varying domains like Constructive Algorithms, Graphs, Trees, Dynamic Programming etc

Problem Statement

The contest will be held on 14th April from 9:30 PM and the contest duration is of 150 minutes. There will be 15 problems of varying difficulty level. The problems will be mainly from topics like Constructive Algorithms, Graphs, Trees, Dynamic Programming etc. The rankings will be ACM style and will be a closed contest on Codechef.

Format

This will be a team contest one team from each bhawan can take part except Rajendra Bhawan, for Rajendra Bhawan multiple teams can take part but only the team which is ranked best will be considered for calculation of points which will be included in the General Championship. Each team will consist of 5 members (the members should be of the same Bhawan).Contact your Bhawan Contingent Leaders to participate

Contest Venue

The contest will take place in New LHC and will be proctored. All the participants should report along with their Laptops (chargers and extensions are also recommended). Notebooks and Pens are allowed. Final Venue will be shared on Discord once teams are created

Calculation of Points in GC

The points will be given on percentile basis and will be added to your overall General Championship score. For Example:- Suppose 10 teams participated in the contest and if you are ranked 1st then you will be given 100 points, 2nd ranked Bhawan will be given 85 points and so on
